

**NEW** Belyntic Peptide Purification Kit

- ✓ Fast & easy purification of crude peptides
- ✓ Instrument-free parallel purification
- ✓ Low solvent consumption
- ✓ Solubilization of hydrophobic peptides
- ✓ Hands-on explanation on YouTube

1. SPPS will result in the target peptide and truncated sequences.
2. At the end of SPPS the PEC-Linker is attached to the N-terminus of the target sequence.
3. All peptides are cleaved from the solid support with TFA.
4. The target sequence will bind via the PEC-Linker to agarose, subsequently truncated sequences and other reagents are washed away.
5. After traceless cleavage from the agarose the target sequence is collected in highly pure form.

- ✓ 75% less solvent consumption in comparison to HPLC
- ✓ 80% time savings when purifying 8 peptides in parallel
- ✓ 100% purification selectivity due to chemical separation

**NEW** Belyntic Peptide Purification Kit

**Smart and efficient technology:**

**Step 1:**

Standard SPPS with Fmoc/tBu strategy.  
Capping with acetic anhydride after each coupling.

**Step 2:**

Conjugation of the **PEC-Linker** followed  
by cleavage from the resin with TFA.

**Step 3:**

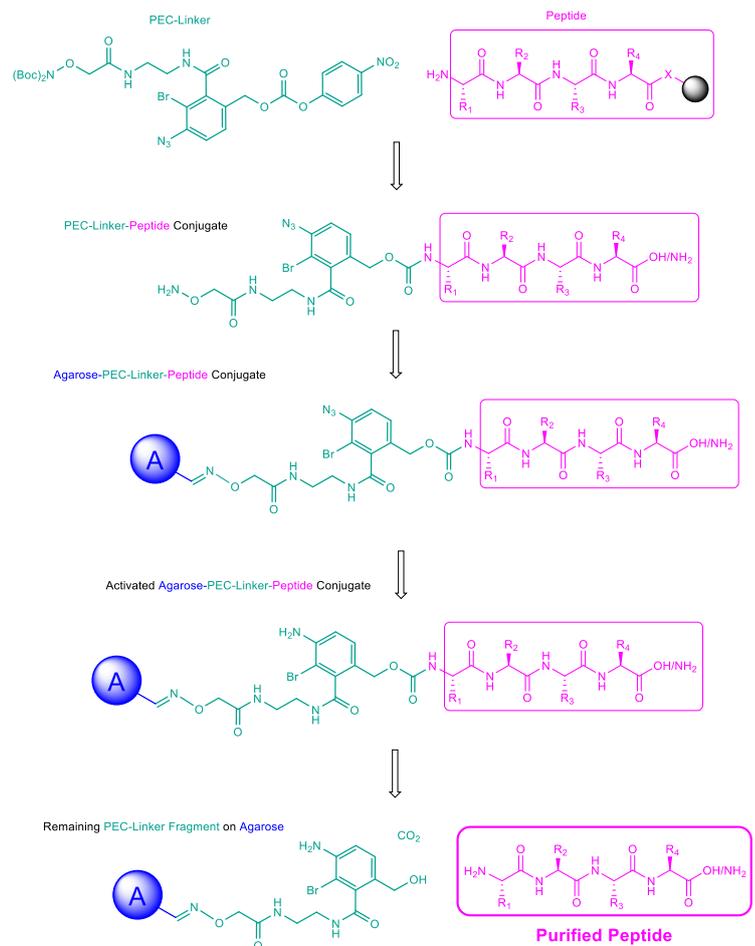

Immobilization of the **PEC-Linker-peptide**  
conjugate on **agarose** and removal of  
deletion sequences and impurities.

**Step 4:**

Activation of the **PEC-Linker**.

**Step 5:**

Release of highly **pure target sequence**  
from **agarose**, followed by collection and  
isolation.

The Ready-to-Use package comes with PEC-Linker, pre-filled cartridges and related consumables:

	Research Kit 24x 10 µmol	Research Kit 8 x 25 µmol	Research Kit 8 x 100 µmol
<b>PEC-Linker</b>	RC+	RC+	RC+
<b>Activated filter material</b>	Agarose100 Filled in 24 fritted syringe reactors	Agarose100 Filled in 8 fritted syringe reactors	Agarose100 Filled in 8 fritted syringe reactors
<b>Reducing Agent</b>	DTT (Dithiothreitol)	DTT (Dithiothreitol)	DTT (Dithiothreitol)
<b>Blocking Agent</b>	L-Cysteine	L-Cysteine	L-Cysteine
<b>Buffer</b>	mixture of citric acid/sodium carbonate	mixture of citric acid/sodium carbonate	mixture of citric acid/sodium carbonate
<b>English Manual</b>	included	included	included
<b>Product Code</b>	BYR2410	BYR0825	BYR8100
<b>Price</b>	€ 540.00	€ 350.00	€ 600.00
